Recycling of plastic productions wastes and the recovery of LVP fraktions.
We get the best of it!

A slender foot for the environment.
CO₂-reducing plastic recycling.
Flexibility with Application. 
And with Thinking.

Plastics fulfill numerous tasks in our daily life. They impress besides other things with their durability and low weight. To recycle plastics scraps efficiently is quite not so easy however. Alongside with the technical know-how a well-developed infrastructure is required. The Tönsmeier specialist centre plastics has taken up this challenge and has been successfully operating in the market for many years.

As we have made it part of our company's philosophy to always think one step ahead, we have made our mark with high-end recycled materials. We may also be regarded as the specialists for the production of first class PVC profiles from the derived materials. Thus we made our way to rank among the leading plastic recyclers in Europe.

For good reason. From container provision to product development we offer extensive service under one roof. In addition to that a more extended footprint: we can draw on a dense network of branches of our group and logistics that operate throughout Europe.

Grown with our responsibility: 
A clean hand with plastics.

We accept responsibility. 
And your plastic material.

PVC plastic production scraps or plastic pipes, PVC windows do accrue in your procedures? Then you have found the right partner with us to professionally prepare those and return them to the material circuit. A relieve not only for the environment but also for the green conscience of your clientele. A clean CO₂ footprint is the adequate approach in modern waste management!

We accept the following pre-consumer fractions:

- e.g. fractions from extrusion & injection moulding applications
- ABS
- PA
- PC
- HD/LD PE
- PP
- PMMA
- PS
- PVC

We offer the following high-end products:

- regrinds, agglomerates and regranulates
- from the following fractions
- ABS
- HD/LD PE
- PP
- PS
- PVC

In case of queries as to further fractions or products please feel free to contact us (refer to backside).

Optimised Logistics. 
With our container systems.

DB box: 0,75 m³
1200 x 800 x 980 mm

Normalbox: 2 m³
1200 x 1000 x 1850 mm

Frame box: 3,4 m³
2000 x 1000 x 1700 mm
